CONTENTS

Special Issue
C.R. Rao 80th Birthday Felicitation Volume, Part I

Edited by Jagdish N. Srivastava

Assistant Guest Editor: Shyamal Peddada

Volume 103, Numbers 1–2

Preface *J.N. Srivastava* 1

Some remarks on arithmetic physics *V.S. Varadarajan* 3

Jump–diffusion Markov processes on orthogonal groups for object pose estimation *A. Srivastava, U. Grenander, G.R. Jensen and M.I. Miller* 15

Martingale generating functions for Markov chains *E.J. Williams and R.K. Watson* 39

Moving-maximum models for extrema of time series *P. Hall, L. Peng and Q. Yao* 51

On asymptotic distribution and asymptotic efficiency of least squares estimators of spatial variogram parameters *S.N. Lahiri, Y. Lee and N. Cressie* 65

Group invariant inference and right Haar measure *M.L. Eaton and W.D. Sudderth* 87

On the performance of subset selection rules under normality *S.S. Gupta and K.J. Miescke* 101

A composite likelihood approach to (co) variance components estimation *S. Lele and M.L. Taper* 117

Correspondence analysis and diagonal expansions in terms of distribution functions *C.M. Cuadras* 137

On the construction of multiple use confidence regions based on combined information in univariate calibration *T. Mathew and M.K. Sharma* 151

On extremal correlations *K.R. Parthasarathy* 173

Directed likelihood ratio tests for ordered alternatives and inference results for the star-shaped restriction *A. Cohen and H.B. Sackrowitz* 181

Selecting the most reliable Poisson population provided it is better than a control: a nonparametric empirical Bayes approach *S.S. Gupta and T. Liang* 191

Nonsubjective Bayes testing—an overview *J.K. Ghosh and T. Samanta* 205

Bayesian analysis and design for comparison of effect-sizes *M.J. Bayarri and A.M. Mayoral* 225

Nonconjugate Bayesian regression on many variables *B.Q. Fang and A.P. Dawid* 245

Strong matching of frequentist and Bayesian parametric inference *D.A.S. Fraser and N. Reid* 263

A journey in single steps: robust one-step M-estimation in linear regression *A.H. Welsh and E. Ronchetti* 287

A consistent test for heteroscedasticity in nonparametric regression based on the kernel method *H. Dette* 311

A class of rank-score tests in factorial designs *E. Brunner and M.L. Puri* 331

Smooth estimation of multivariate survival and density functions *Y.P. Chaubey and P.K. Sen* 361

How are moments and moments of spacings related to distribution functions? *M.C. Jones and N. Balakrishnan* 377

On solutions for global Stein optimization problems with applications *S. Ralescu* 391

Results on nonlinear least squares estimators under nonlinear equality constraints *A. Pázman* 401

Analysis of multivariate longitudinal data using quasi-least squares *N.R. Chaganty and D.N. Naik* 421

Model checking in loglinear models using ϕ-divergences and MLEs *N. Cressie and L. Pardo* 437

Some theory for penalized spline generalized additive models *M. Aerts, G. Claeskens and M.P. Wand* 455
